SOA Guide

Home > Visitor Information > SOA Guide

For visitors to SOA, your fascinating "round the world" underwater journey begins from the Yangtze River in China, then on to the mysterious flooded forest of the Amazon in South America. Next you will find yourselves at the mangroves and billabongs of Australia. You will then meander through the rivers of Africa before arriving at the rainforests of Southeast Asia. Brave the cold as you go through the icy waters of the Antarctic. The last leg of your journey will take you from the sandy shores to the depths of the ocean...
